# THE

# ELECTRICAL WORLD

A REVIEW OF CURRENT PROGRESS IN ELECTRICITY
AND ITS PRACTICAL APPLICATIONS

## VOLUME LI

---

## JANUARY 4 to JUNE 27, 1908

---

NEW YORK

ELECTRICAL WORLD

# INDEX TO VOLUME LI

## GENERAL INDEX

*Entries from the Digest of Current Electrical Literature are indicated by D (Digest) and D R (Digest Reference)*

### A

Acheson, E. G., Portrait of, *964
Advertising. (See Central station business; Signs, Electric)
Afghanistan, Electricity in, 334
Air-gap, Size of, 255
Air-gap correction coefficient. By P. H. Powell, (D.)438, 1127
Albert Lea, Minn., Electric development at, 706
Allen, L. B., Co., Chicago, 736
Allgemeine Elektricitäts Gesellschaft, Anniversary celebration, 989
Allis-Chalmers Co., *64
——Meeting of managers, 266
Alloys:
——Heusler, Effect of heat treatments on magnetic properties. By A. D. Ross, (D. R.) 189
——Magnetic. By P. Asteroth, (D.) 1242
——Temperature-resistivity coefficient. Formulas of Matthiessen and Barus. By W. Guertler, (D. R.) 263
Alternating-current problems, Device for solving, *1365
Alternating currents:
——Complex quantities in, 754
——Losses in alternating-current systems, (D) *1382
——Representation of phenomena. By D. W. Rennie, (D.) 865
Alternators:
——Commutator motors, with special reference to traction. By M. Osnos, (D.) 187
——Compounding, Ganz method, (D.) *984
——High-frequency alternators. By Louis Cohen, 328, *345; A. T. Kasley, *715
——Hunting of, driven in parallel, 167; by C. Oscanyan, 351, 437
——Italian 12,000-hp steam turbo-generator, *1299
——Magnetic oscillations in alternators, 328; by G. W. Worrall, (D.) 353
——Parallel connection. By G. Benischke, (D.) 1239
——Parallel operation. By W. V. Lyon, 187; M. V. Ayres, 352; Morgan Brooks, 640; Henry Herman, 1081, *1100, 1230; L. Fleischmann, (D.) 1239
——Revolving-field, Construction details, *1168
——Standard performance. By R. Goldschmidt, 419, (D.) 438
——Starting and protecting device, (D.) *57
——Surging of alternators. By G. Benischke, (D.) 187
——Testing, Method of obtaining desired inductive load used. By T. Fraser, (D.) *264
——Tests of British low-voltage alternator, (D.) 353
——Torque conditions in various types of motor. By V. A. Fynn, (D.) 148
——Turbo-alternator, Allis-Chalmers, *64
——Turbo-alternators at Wolverhampton, England, *982
——Ventilation of belt-driven, *63
——Voltage regulation. By M. Seidner, (D.) *1239
Aluminum industry in England. By J. B. C. Kershaw, (D.) 936
Aluminum production, 1278
"America revisited." By W. H. Preece, (D.) 780
American Electrochemical Society, 844, 964, 1089
American Engine Co., *515
American Floor-Surfacing Machine Co., *518
American Institute of Electrical Engineers:
——Annual convention, 544, 1129, 1275
——Assistant secretary, 551
——Boston section, 1130
——Cleveland section, 1129
——February meeting, 377
——Ithaca section, 639, 1013
——Membership, Value of. By D. B. Rushmore, 332; Elihu Thompson, 551
——Pittsburg section, 219
——Pittsfield section, 382, 550, 759
——Public service dinner, 423
——Schenectady section, 551
——Toledo section, 382
——Toronto section, 425, 1131
American Instrument Co., *574
American Museum of Safety Devices:
——Dinner to Messrs. Kirchoff, Martin and Rev. Grant, 170
——Exhibition, 805, 893, 1131
American Society of Mechanical Engineers, 849, 1085
American Telephone & Telegraph Co., Annual report, 633, 678
Ammeter, Bristol recording, shunt type, *65
Annunciators, Marine, *113
Arc and brush discharge. By M. Toepler, (D.) 1382
Arc-lamp coupling, (D. R.) 1108
Arc-lamp economizer, Hallberg, *1248
Arc lamps:
——Acme lamp, *734
——Beck lamp, *1054
——Brewer, (D.) *1291
——Cravens, Magnetic deflector, *334
——Direct-current arc between metallic electrodes. By A. Grau and F. Russ, (D.) 397
——Flaming. By A. S. Pearl, *1059
German, *1063
Grant, *1061
Jandus regenerative, (D.) 567, *655, 776
Progress in. By A. Blondel, (D.) 107
Use of in America, 7
——Future status of the arc lamp, 418
——"Hawthorne" short arc, *522
——Inclined electrodes, *1244
——Inverted lamps for pressroom of Curtis Pub. Co., *112
——Luminous arc lamp for constant-potential circuits, G. E., *441
——Luminous arc for electric cars, *1169
——Magnetite arc. By G. M. Dyott, 842, *854
——Magnetite arc for street-car headlamps. By G. N. Chamberlin, (D. R.) 307
——Photography, Arc lamp for, *192
——Physical properties compared, 219
——220-volt to 250-volt direct-current, enclosed. By G. N. Chamberlin, (D.) 307
Area scale, (D.) *265
Armature disk-cutting press, *312
Armature disk notcher, *312
Armature disk and segment cutting press, *993
Armatures:
——Drying out armatures and field coils. By J. L. Longworth, 716
——Four-pole, Coils in slots one and eleven, 503
——Heating of. By G. Schmaltz, (D.) 655
——Watt-hour meter, Testing device. By L. D. Snow, *1215
Art, Electrolytic, (D. R.) 1109
Art Machine Co., *65
Artificial load for testing. By R. K. Morcom and D. K. Morris, (D) *865
Assessment of street railways in Great Britain. By J. F. C. Snell, (D.) 149
Atlanta, Ga.:
——Central station notes, 904
——Electric service suspended, 374
Atlantic Electric Goods Co., 403
Atmosphere, Potential variation in. By D. Smirnow, (D) 1384
Auto Transit Co., Phil., Generating station and garage, *383
Automatic Switch Co., *154, *359, *519, *825 *941
Automobile Engineers, Society of, Meeting, 129
Automobile motors. By Sieg, (D.) 354
Automobiles:
——Dynamometer for testing, Automobile Club of America, *143
——Electric trucks for docks, 898
——Electric, Progress. By W. A. Th. Mueller, (D.) 108
——Maxim and Goodridge electric, *1245
——Gasoline-electric. By P. Gasmier, (D. R.) 354
——Gasoline-electric omnibus, London, (D.) 262, 354
——Petrol-electric autobuses. By P. T. Smith and W. A. Stevens, (D.) 864
——Remote control of electric truck, Omaha, Neb., 967
——Wireless motor car, 898
Ayvad Mfg. Co., Use of single-phase motors, *110

### B

Bakery trade, Motor equipment in, 491
Baltimore, Md., Municipal conduit system, *13
Bank, Boston First National, Electricity in, 1197
Barretter, Experiments with. By K. E. F. Schmidt, (D.) 866
Bates, D. L., Brother Co., *529
Battery, Dry, Directions for making, 48, 503
Bayonne, N. J., New business campaign. By W. H. Stuart, 259
Bearings:
——Ball, for electric motors, (D.) 261
——Ball, for vertical shaft lower end journals, *442
——Cooling arrangement, *41
Belgian Exposition, 10
Bell telephone report, 633, 678
Bells, Push button combinations for ringing, 48, 503
Belt-tightener for electric motor, *443
Belts, Dynamometer dynamo. By J. F. Hobart, *921
Benjamin Electric Mfg. Co., *67, *871, *1345
Bergmann Electrical Works, *1302, *1303
Bethlehem Steel Co., Motor equipment of rail and structural mills, *469
Bidwell, Benson, and Charles Bidwell, 468, 598
Birmingham, Ala., Electric signs at, *506
Blake & Knowles Steam Pump Works, *828, *1386
Block signals. (See Signals.)
Bliss, E. W., Co., *312, *993
Block signals. (See Signals.)
Blow-off valves for steam boilers. By R. S. Strohm, *495
Blow-out, Von Zweigbergk, 330
Blowers:
——Foundry, *1112
——Motors for driving, 720
Bogue, Charles J., Electric Co., 403
Boiler flue plug, Betterman, *65
Boiler regulations in France, (D. R.) 107
Boiler-room economics. By Wm. Westerfield, 500
Boilers:
——Blow-off valves. By R. T. Strohm, *495
——Diseases of. By F. S. Allen, 638
——Efficiency of heating surfaces. By C. H. Wingfield, (D.) 1291
Bolton Falls, Vt., plant, *31
Book reviews:
——Alternating Currents. By C. G. Lamb, 514
——Alternating Currents. By Alex. Russell, 514
——Annuaire pour l'An, 1908, 356
——Aufgaben aus der Elektro-technik Nebst deren Losungen. By E. Mullendorff, 988
——Autogenous Welding of Metals. By L. L. Bernier, 1296
——Automatic Block Signals. By Ralph Scott, 937
——Beiträge zum Kommutierungs problem. By Karl Waldmann, 1295
——Brief Guide to Vibratory Technique. By N. M. Eberhart, 514
——Colorado Springs Lighting Controversy. By Henry Floy, 730
——Continuous-Current Engineering. By Alfred Hay, 731
——Découvertes Modernes en Physique. By O. Manville, 868
——Deutsches Patentrecht fur Chemiker. By Dr. Julius Ephraim, 400
——Electrical Energy. By E. J. Berg, 266
——Electrical Engineering. By Adolph Thomälen, 310
——Elektrische Belenchtung. By Berthold Monasch, 988
——Eliktrische Centralen. By K. Wilkens, 867
——Elektrische Traktion. By G. Sattler, 1295
——Erklärung der Gravitation, der Molekularkräfte, der Warme, des Lichtes, der Magnetischen und Elektrischen Erscheinungen. By Johann Sahulka, 1296
——Experimental Electrical Engineering. By V. Karapetoff, 659
——Gleichstromerzeuger und Motoren. By W. Winkelmann, 659
——Gleichstrommaschine. By E. Arnold, 659
——Grundzuge der Beleuchtungstechnik. By L. Bloch, 1295
——Handbuch der Angewandten Physikalischen Chemie. By Dr. Alex. Findlay, 310
——Handbuch der Angewandten Physikalischen Chemie. By Dr. Fritz Foerster, 356
——Hilfsbuch, fur der Elecktrotechnik. By Dr. Karl Strecker, 310
——Impianti Elettrici a Correnti Alternate. By A. Marro, 310
——Inductions Motors fur Einphasen-Wechselstrom. By R. von Koch, 868
——Insulation of Electric Machines. By Turner and Hobart, 868
——Introduction to the Study of Electrical Engineering. By H. H. Morris, 731, 762
——Ionizzazione e la Convezione Elettrica nei Gas. By L. Amaduzzi, 399
——Magnetisme et de L'Electricité. By A. Nouguier, 659
——Mechanical Design and Construction of Commutators. By R. Livingstone, (D.) 937
——Mitteilungen über Forschungsarbeiten. By Julius Springer, 869
——Moderno Teoria dei Fisici. By A. Righi, 356
——Montage Elektrischer Licht und Kraftanlagen. By Dr. Max Jenecke, 110
——O Concurso da Viacao Americana. By Bernardo Lucas, 310
——Physikalische Grundlagen der Gleich und Wechselstromtechnik. By A. Koenigswerther, 867
——Practical Physics. By W. S. Franklin, 731
——Problem der Schwingungserzeugung. By Dr. H. Barkhausen, 868
——Projektierung von Elektrizitätswerken. By F. Hoppe, 441
——Railroad Men's Catechism. By Angus Sinclair, 1295
——Society for the Promotion of Engineering Education, 58
——Sommeil Electrique Epilepsie Electrique et Electrocution. By Dr. L. G. Robinovitch, 1295
——Standard Handbook for Electrical Engineers, 58, 110, 1161
——Stationary Steam Engines. By W. H. Fowler, 730

*Indicates illustrated articles.

Book Reviews: (Continued)
——Stromverteilungssysteme und Berechnung Elektrischer Leitungen. By Phil. Hafner, 1295
——Suction Gas. By O. H. Haenssgen, 731
——Synchronmaschinen für Weckselstrom und Drehstrom. By W. Winkelmann, 867
——Technical Dictionary in Six Languages. By Chas. Kinzbrunner, 400
——Theorie der Elektrizität, 1296
——Thomas Alva Edison. By F. A. Jones, 514
——Transformatoren und Asynchronmotoren. By W. Winkelmann, 867
——Universal Electrical Directory, 868
——Untersuchung Elektrischer Systeme. By Herbert Hausrath, 1295
——Vorlesungen uber die Vektorenrechnung. By E. Jahnke, 867, 988
——Was Sind und Wie Entstehen Erfindungen. By Josef Lowy, 571
——Wechselstromkurves. By Dr. Ernst Orlich, 868
——Whittaker's Arithmetic of Electrical Enneering, 1295
——Wissenschaftlichen Grundlagen der Elektrotechnik. By Dr. G. Benischke, 1295
Booster, Pirani reversible. By W. Weissbach, (D.) *985
Boring and turning mill, Sellers. *1244
Boring tool, Home-made motor-driven. By E. D. Kelly, *717
Bossert Electric Construction Co., *523
Boston:
——Edison rate decision, 1270
——Lighting matters, 1128
——Schoolhouse lighting rates, 757
——Y. M. C. A. electrical course, 1093
Boston Edison Co. and educational plans, 1362
Boston Edison Co. and tungsten lamps, 1128
Borey, Dean, Appointment of, 684
Brakes:
——Best material for friction surfaces. By H. D. James, (D.) 1292
——Electric, for motor testing, *574
——Electromagnetic, Design of. By J. Nikonow, 798, *811
——Emergency, Pringle, (D.) 1158
——Maley electromagnetic, (D.) *56
——Rolling mill motor service, Westinghouse, *358
Break-down service in New York City, 172, 462, 546, 553, 682, 683, 757, 801
Brickwork for central stations, (D. R.) 569
Bridges, New Harlem River, 88
Bristol Co., *444, *870
British National Physical Laboratory, 766
Brooklyn Edison Co.:
——Educational courses, 800
——Tungsten lamps, 1192
Brushgear, British, for direct-current turbo-generators, (D. R.) 776
Brushes, Setting of. By Carl Gardeen, *253; H. E. Bishop, 499
Buildings for power houses. By H. Boot, (D. R.) 397
Business conditions, 673

## C

Cable drum operated by electricity. By H. Schultz, (D. R.) 58
Cables:
——Alternating-current transmission in cables. By C. V. Drysdale, (D.) 108, 111; B. S. Cohen, (D.) 1111
——Capacity tests. By F. J. O. Howe, (D.) *779, *821
——Construction and testing of high-tension. By C. Feldmann and J. Herzog, (D.) 58, (D. R.) 1109
——Drawing cables into pipes or ducts. By W. Plesance, (D.) 108
——Faults in multicore cables, (D.) 729
——Graded cables. By C. S. Whitehead, (D.) 1342
——"Grading" cables, Italian and British patents for, (D. R.) 262
——Heating of cables with intermittent load. By R. Apt, (D.) 1159
——High-tension, for energy transmission. By R. Apt, (D.) *613
——Lead-covered, in deep mines, 382
——Manufacture of, British factory, (D. R.) 262
——Paper insulated cables. By F. Tremain, (D. R.) 1111
——Submarine:
Capacity determination. By A. Tobler, (D.) *1293
Sydney Harbor, (D.) 1384
——Telegraph, in Austria. By E. F. Patritsch, (D.) 1243, 1294
——Telephone:
Capacity of. By A. Zeleny and A. P. Andrews, (D.) 658
Large British cables, (D.) 1294
Loaded, (D.) 867
Pupin cables, (D.) 823
Testing cables. By B. Gati, (D.) 1111
Troubles with telephone. By G. E. Furnus, (D.) 937
——Underground, Burn-outs of. By D. W. Roper, (D. R.) 1160
——Underground, Economical limits of voltage. By J. B. Sparks, 889, (D.) 935
Cadmium cell, Weston, (D.) 190; by H. S. Carhart, (D.) 309
Calcium cyanide, Manufacture of. By J. B. C. Tershaw, *979, (D. R.) 441
Campbell Electric Co., *616
Canadian Electrical Association, 1274, 1366, 1387
Canadian labor law, 12
Canal rays. By E. Goldstein, (D. R.) 658
Canal rays and the Doppler principle, (D.) 658
Canals:
——Electric haulage tests on Lehigh canal, 595
——Electric hoisting on, Germany. By A. Hundt, (D.) 1158
Capital stock, Are issues of, which do not represent cash invested, justifiable? By W. H. Winslow, 708
Capitalization of public utilities. By C. M. Brown, 903
Car fares in Detroit, 174
Car lighting (See Lighting, Train lighting)
Cars:
——Gasoline-electric, *191, 683
——Motor cars, Paris. By A. Solier, (D. R.) 308
——Pay-as-you-enter, in New York, 641
Carbon bisulphide, Production in electric furnace. By E. Rutherford, (D. R.) 513
Carbon cells, Juugner patent, (D.) 1385
Carlisle & Finch Co., *993
Carnegie Institution, Work of, 1092
Carpet sweeper and vacuum cleaner, Combined electric, *1171
Catalogue engineering, 961
Cathode rays:
——Heat of, 761
——"Magnetic" rays. By A. Righi, (D.) 821
Central Electric Co., *940
Central Georgia Power Co.'s plant, 845
Central station business:
——Advertising:
Birmingham, 723
Concentrated effort. By J. O. Little, 929
Literature for distribution. By N. G. Meade, *724; A. J. Haire, Jr., *926
——Bayonne, N. J., New business. By W. H. Stuart, 359
——Business-getting methods discussed at N. E. L. A., 1184, 1194, 1195, 1196
——Business-getting. Public service corporations and the public. By H. H. Mac Pherson, 1202
——Capitalizing new business investments. By C. L. Ford, 54
——Cincinnati campaign for new business, 726
——Commercial aspect of electric energy supply. By W. B. Woodhouse, (D.) 261
——Commercial possibilities of the small station, 27
——Co-operation of central stations and contractors, 1360
——Cost of steam-driven plants. By F. Koester, (D.) 55
——Depreciation of properties. By C. N. Duffy, 207, 217
——Discretion in business building, 1359
——Dubuque, Ia., Business-getting campaign, 50, 210
——Dubuque, Ia., Tungsten lamp policy, 1094
——Educating customers, 304
——Elevator conditions in New England, 237
——Fitchburg, Mass. By W. H. Stuart, 481; A. H. Kimball, 483
——Free lamp renewal. By H. N. Muller, (D.) 776
——"Genesis of a day circuit." By H. B. Brooks, 250
——Greenfield, Mass., 703
——Heating load, Advantages of. Experiences with. By E. L. Callahan and others, 436
——Inquiry department, Maintenance of. By J. G. Learned, 49
——Jackson, Miss., Electrical development, 234
——Jersey City, N. J., New business. By W. H. Stuart, 930
——Lighting in cities and villages of 3,000 inhabitants and under, 464
——Load factors in towns with few stores, 373
——Mass., Operating results, 1322
——Memphis, Tenn., Growth of service, 184
——Metallic-filament lamps and the central station. By H. W. Handcock and A. H. Dykes, (D.) 1056, 1057, *1240
——Motor applications in various industries in U. S., 490
——Motor business, Obtaining new. By N. G. Meade, *504
——Motor load from view point of central-station service. By C. K. Nichols, *486
——New business, Discussion of, at Iowa convention, 1015
——New England situation, 28
——New Orleans, La., *340
——Operation of small electric plant. By W. H. Wakeman, *41, *246; R. B. Coleman, *490
——Personal solicitation. By A. J. Haire, Jr., 707
——Popularizing the use of electricity, 1018
——Renewals of expensive lamps, 210
——Reserve equipment, Provision for, 1230
——Review of 1907, 7
——Selling electrical energy. By A. H. Keleher, 258
——Sign business, Shreveport, La., 683
——Solving some power-house problems. By G. W. Martin, *712
——Suggestions for obtaining a motor load. By N. G. Meade, 256
——Test of a medium capacity central station, methods employed. By H. S. Knowlton, *696
——Tests, Convenient, for central station operators. By W. M. Hollis, *244
——Vacuum cleaning apparatus. By John Jackson, 44
——Wabash, Ind., Tungsten lamp policy, 1094
——Waterloo, Ia., Analysis of output, 1192
——Waterloo, Ia., Influence of load factor on cost of production, 1018
——Winona, Minn., Remarkable improvement in load, 608
Central stations:
——Baltimore. Generating and distributing system of United Railways & Electric Co., *969
——Bolton Falls, Vt., *31
——Chicago, Commonwealth Edison Co., System and operating practice, *1023
——Combined central station and water-pumping plant, Pine Bluff, Ark., *427
——Combined gas and steam engine plants, Mankato, Minn., 676, 702
——Combined lighting and pumping plant at Willoughby, Ohio. By J. F. Hobart, 46
——Combined refuse destructor and electricity works at Greenock, (D.) 728
——Combined refuse destructor and electric generating station, London, (D.) 397
——Connellsville, Pa., Improvements, (D.) 933
——Delaware & Hudson Co., Mechanicsville, N. Y., *1048
——Derby, England, New station, (D.) 189
——Direct-current, high-tension supply system in England, (D.) 1058
——Exciter units in large plants. By F. E. Conrad, 924
——Fall River, Mass., Turbine station, *175
——Far East, Statistical data, (D. R.) 512
——Fitchburg, Miss., Service. By W. H. Stuart, *481
——France, on coast of Mediterranean Sea. By Armagnat, (D.) 107, 149; G. Dary, (D.) 1057
——Germany:
Coburg Municipal plant. By O. Ely, (D.) 398, 512
Cologne station, (D.) 569
Gas-electric station at Steudal, (D.) 398
Mainz, Equipment. By Furker, (D.) 151
Rhine River, 331
Statistics, (D.) 777
——Government regulation of power plants, 800
——Great Britian, Statistics, (D.) 398, 512, 1383
——Italy:
Trezzo, (D.) 567
Tusciano plant. By J. Spadini, (D.) 354
——Loben, Austria, (D. R.) 1158
——London, Central London Ry., (D.) 1340
——London, Proposed consolidation of companies, (D.) 189, 301
——Lowell, Mass., (D. R.) 1158
——Milwaukee, Excellent conditions, 897
——Niagara Falls Hydraulic Power & Mfg. Co. By G. R. Shepherd, (D. R.) 307
——Number of, in U. S., 887
——Pennsburg, Pa., Municipal lighting plant, *24, 134
——Post Falls station of Washington Power Co. By C. S. MacCalla, *1095, *1135
——Private and municipal plants, 1008
——Refuse-destructor power station at Greenock, England, (D. R.) 657
——Seattle, Wash., Turbo-generator station, *1325
——Small:
Economical operation of. By J. C. Whittlesey and Paul Spencer, 1104, 1154, *1211
Opportunities of, 25
——South Africa, at De Beers mines. By P. A. Robbins, (D.) 986
——Sweden, at Trollhätten, (D.) 397
——Switzerland:
Geneva project. By R. Weber, (D. R.) 397
Hydraulic equipment, (D. R.) 567, 612, (D.) 728, 1057; M. Yazidjian, 775
Statistics. By A. Weber, (D.) 1341
——Troppau, Austria. By O. Armknecht, (D.) 189, 308
——Watertown, N. Y., No attendants. By A. H. Lefevre, (D.) 398
Charging for electric current:
——Atlanta, Ga., 904
——Boston Edison rate decision, 1270
——Break-down service in New York City, Investigation, 172, 462, 546, 553, 682
——Brooklyn Edison Co. and the tungsten lamp, 962
——Chattanooga, Tenn., 905
——Controversies over electric rates, 213
——Dubuque, Ia., Changing show-window lighting to flat rates, 50, 210
——Fitchburg, Mass., 483, 484
——Germany. Price of supply and hours of burning lamps. By G. Dettmar, (D.) 986
——Greenfield, Mass., 704
——Lafayette, Ind., 966
——Memphis, Tenn., 184
——Minneapolis:
Argument on light and power rates, 465
Controversy between city and company, 213
Report by C. L. Pillsbury, 651
——New lamps and renewal rates, 890
——New York City:
Rates, 552, 1269
Tungsten lamp, 1083
——New York State. State right to fix lighting rates, 215, 461
——Renewals of expensive lamps, 210
——St. Louis, New system of rates, 460, 509
——Sliding scale of lighting prices proposed in Mass., 1131
——Sweden, Price of electric energy in, (D.) 986
——Tantalum lamps, Muncie, Ind., *146
——Tungsten clusters on flat rate, Chicago, 967, 1205

Charters, Construction of, 37
Chase-Shawmut Co., 523
Chattanooga, Tenn., Electrical developments, 905
Chelsea, Mass., Electric service and the fire at, 804
Chemical engineers, Institute of, proposed, 1022
Chicago:
——Commonwealth Edison Co., System and operating practice, *1023
——Electric light ordinance, 592, 678
——Special street lighting, *29
Chicago City Ry. power contract, 1362
Chicago drainage canal power, Trouble over, 1268
Chicago Electric Club, 637
Chicago Electrical Show:
——Attendance, 381
——Decorative lighting, *87
——Exhibits, 168, *194, 267
——Opening, 128
——Special days, 87
Chicago Pneumatic Tool Co., *572
Choke coil, Laminar, *1301
Circuit-breakers:
——Air-break circuit breakers and their application, *400
——Alioth high-tension. By Henry, (D. R.) 728
——Carbon-break. By F. W. Harris, (D. R.) 778
——Low-tension alternating-current circuits, *940
——Oil, electrically operated. By S. Q. Hayes, *911
——Operating methods, time-limit features, etc. By F. W. Harris, (D. R.) 513, (D.) 935
——75,000-volt automatic oil circuit-breakers, Fernando, Cal., *731
Civil Service examination for electrical engineer, 1131
Cleaning. (See Vacuum cleaning)
Clemson College, South Carolina, Electrical engineering equipment, *1332
Climax Hoist Co., 1385
Clock in air-sealed housing, 255
Clocks, Electric. By H. H. Cunynghame, (D.) 729
Clutches:
——"Hele-Shaw," *992
——Induction-type, *1300
Coal. (See Fuel)
Coal-handling plant of Berwind Fuel Co., Superior, Wis., 113
Coaling machinery at Savona Harbor, Italy. By F. Collischonn, (D.) 354
Coates Clipper Mfg. Co., *1301
Coffee mills, Electric, *68, *735
Coils:
——Calculating, (D. R.) 1242
——Manufacture. By F. Schnaubert, (D.) 988
Coin counters, Electrically operated, *504
Coke extractor, Electric. By M. R. Clarke, (D. R.) 307
Coles Mfg. Co., *68
College training of electrical engineers. By A. C. Scott, 815
Colloids, Movement of, under influence of electric field. By A. Mayer and E. Salles, (D.) 1160
Colonial Fan & Motor Co., *528
Colorado water-power development, *422
Columbia University, Changes in engineering curricula, 847
Communication between United States and Europe, Statistics, 131
Commutation theory. By A. Goldschmidt, (D. R.) 55, 511, (D.) 776, 932; R. Rüdenberg, (D.) 396; C. L. R. E. Menges, (D. R.) 655, 1380; A. Press, (D.) 776
Commutation zone, Neutral. By C. L. R. E. Menges, 147
Commutator grinder, Phillips, *114
Commutators. Mica insulation on traction motors, 603
Concentration cells, E. M. F. of. By H. S. Carhart, (D.) 865
Condensers:
——Calculation of capacity. By F. W. Springer, *387
——Manufacture of. By G. F. Mansbridge, (D.) 1293
——Paper, Capacity of. By A. Zeleny and A. P. Andrews, (D.) 658
——Variation of capacity apparent. By B. V. Hill, (D. R.) 822, (D.) 1293
Conduction in solids. By J. Koenigsberger, (D.) 355; J. Koenigsberger and K. Schilling, (D) 1384
Conductors, Temperature rise of. By C. C. Badeau, 82, 95; M. Garcogne, (D.) 1109
Conduit system. (See Railways)
Conduits:
——Bituminous, (D.) 1159
——Easily constructed conduit and service boxes. By T. C. Lerret, *1216
——Elmira, N. Y., Conduits for overhead wires, 173
——Telephone conduit construction. By B. C. Groh, 393
Conkling Co., *871
Connectors, Wire, *615
Contact e. m. f. and cohesion. By F. Sanford, (D.) 1342
Controllers:
——Elevator automatic control, *825
——Single-phase railway controllers. By C. Kraemer, (D.) 777
Controlling electric apparatus from a distance by electric waves. By L. Dubois, (D.) 823
Converters:
——Cascade, Operation of. By A. Bloch, (D. R.) 439
——Design and operation of railway converters. By J. E. Woodbridge, 371, 386
Converters: (Continued)
——Frequency converter with starting motor, Crocker-Wheeler, *192
——Operation of rotary, in parallel, to supply direct-current load, 48
——Rotary, Effect of variation in exciting current, 720
——Rotary, in Great Britain. By T. Fraser, (D. R.) 1290
——Rotary, Theory of. By E. J. Berg, (D. R.) 306, 611, 863
——Rotary, with synchronous voltage regulator, *1062
——Synchronous, Developments. By C. W. Stone, 386
Conveyors, Electric freight, New Orleans, La., *340
Cooking, Electric. By E. L. Callahan, (D. R.) 309
Cooper-Hewitt Electric Co., *153
Copper:
——Price of, 417
——Production, 12
Copper refinery, Generating station of. By F. D. Easterbrooks, (D.) 985
Copper refinery, Raritan. By F. D. Easterbrooks, (D.) 1242
Copper refining. By J. B. C. Kershaw, (D.) 1385
Copper smelter at Anaconda, Mont., Induction motor equipment, 827
Corrosion of iron. By C. F. Burgess, 965
Cost:
——Curve sheets for costs and output. By J. B. Morgan, (D. R.) 728
——Generation of energy by different means. By F. H. Hirschland, (D.) 354
——Generating electricity, English lawsuit, 761
——Industrial purposes. Discussion of paper by J. F. C. Snell, (D. R.) 439, (D.) 727
——Power supply from water-power and gas-driven plants. By I. V. Robinson, (D.) 397
Couplings, Flexible insulated, *1113, 1338
Cranes, Electric:
——Brake apparatus. By H. H. Broughton, (D.) 56, 188, 307
——Collectors, switchgear and wiring. By H. H. Broughton, (D.) 1057
——Motor-control systems. By H. H. Broughton, (D.) 727
——Starting and controlling speed of motors. By H. H. Broughton, (D.) 612
——Steamer cranes, (D. R.) 56
Crescent Co., *1111
Crocker-Wheeler Co., *192, *443
Current balance, Ayrton-Mather-Smith design, (D.) 190, 658
Currents in three-phase motors, Curve form of. By K. Simons and K. Vollmer, (D.) 439
Curtis Pub. Co., Inverted arc lamps, *112
Cut-out, Time-element thermal, *991
Cutler-Hammer Clutch Co., *1168

D

Dale Co., *1343
Dam, Hauser Lake, Failure of, *1088
Damper regulators, Automatic. By W. H. Wakeman, *917, *1223; Joseph Harrington, *1225
Damping effects, Measuring. By H. Rausch von Traubenberg and B. Monasch, (D.) 152
Deer, A. J., Co., *735
Definition of terms used in electrical matters, 720
De Fodor, Etienne, *549
Denver advertising scheme, 930
Denver Gas & Electric Co., 1321
Denver plaza, Proposed illumination of, 683
Depreciation of electric lighting properties. By C. N. Duffy, 207, 217
Cost: (Continued)
Diamond-maker Lemoine, 1368
Diaphragms for electrolytic cells, Construction of. By J. R. Crocker, (D. R.) 779
Diehl Mfg. Co., *576
Dielectric losses. Condensers with solid dielectrics. By W. Hahnemann and L. Adelmann, (D. R.) 108
Dielectrics, Testing method. By S. M. Hills and T. Gorman, (D.) *109
Discharge of electricity from pointed conductors. By J. Zeleny, (D.) 569
Discharge of electrodes. By J. G. Davidson, (D. R.) 309
Discharge protector, Lord high-potential, *1386
Discharges, Electric, through gases. By J. J. Thomson, (D.) 779, 820, 865, 987, 1059 1109
Discharges, High-frequency, using a tertiary. By Leo Daft, *1337
Discharges in monatomic gases. By F. Soddy and T. D. Mackenzie, (D.) 1160
Dish-washing machine, *488
Docks, Electric power on. By C. E. Taylor, (D.) 728
——Santos, Brazil, 735
Dough mixer, Motor-driven, *488
Draft of steam-boiler furnaces, Regulation of. By W. H. Wakeman, *713
Dynamometer dynamo belts. By J. F. Hobart, *921
Dynomometer for testing automobiles, Automobile Club of America, *143
Dynamos:
——Air-gap correction coefficient. By P. H. Powell, (D.) 438, 1127
——Armature, Best utilization of. By T. Rosskopf, (D.) 261
——Constant-current machine. By E. Rosenberg, (D.) *106
Dynamos: (Continued)
——Constant current at variable speed, for train lighting. By S. Iglesis, (D.) 776, 1108
——Design of direct-current generators. By H. M. Hobart and A. G. Ellis, (D.) 148
——Errors in connections when replacing dynamo. By C. W. Kenney, *254
——Losses in pole shoes due to armature teeth. By T. F. Wall and S. P. Smith, (D.) 567
——Noisy operation. By N. R. Craighill, *245; F. E. Meurer, 395; E. N. Jennison, 726
——Reluctance of air-gap, Tests. By T. F. Wall, (D.) 187
——Standard performances of electric machinery. By R. Goldschmidt, 419, (D.) 438
——Testing direct-current machines. By S. P. Smith, (D.) 819
——Testing methods. By W. M. Hollis, *710
——Turbo-dynamo development. By R. Pohl, (D. R.) 439
——Vertical-axle machines. By J. Reyval, (D. R.) 567

E

Earth return, Report by Swiss Commission, (D.) 986
Earthing electric installations. By H. Zipp, (D. R.) 569
Eastern Association of Physics Teachers, 802
Eck Dynamo & Motor Co., *529
Economic Power & Construction Co. fined by New York Public Service Commission, 1189
Economical Electric Lamp Co., *1064
Economy, A wasteful. By John Scott, 253
Edison Medal, New deed of gift for, 1013
Edison moving-picture litigation, 381
Education:
——College training of electrical engineers. By A. C. Scott, 815
——Engineering education, 214, 231
——Engineering education in British colleges, 761
——Evening schools for. By W. J. Crawford, (D.) 1343
——Specialization in engineering education, (D.) 824
Eels, Killing by electricity, 1134
Eglin, W. C. L., Portrait of, *1149
Electric Construction Co. of London, *575
Electric drive, Engineering features of. By N. G. Meade, 1232
——(See also Industrial plants)
Electric light association for Pennsylvania, 1021
Electric Machinery Co., *63
Electric power, its progress and possibilities. By A. H. Kimball, 483
Electric Renovator Mfg. Co., *1171
Electric shock:
——New method of resuscitating from, 424
——Rules for resuscitation, 9
——Severe case of. By F. P. Catchings, 1056
Electric Storage Battery Co., *311, 403, *783
Electric waves. By W. R. Blair, (D. R.) 309
Electrical Apparatus Co., London, *443
Electrical code, Revision, 545, 679
Electrical growth in 1907-8, 1
Electrical Manufacturers' Club, 1128
Electrical manufacturing costs, 458
Electrical phenomenon, A peculiar. By F. W. Merrill, *498; A. B. Case, F. O. Broili, 717
Electrical shows. By H. W. Hillman, 1236
Electro-analysis, Progress in. By F. Foerster, (D. R.) 263
Electrochemical analysis with rotating anodes. By A. M. Fairlie and A. J. Bone, (D. R.) 190, 353
Electrochemistry in 1907, 84
Electrolysis:
——Destruction of underground metal pipes. By E. Nourtier, (D.) 934
——Iron and steel, lead and aluminum. By W. W. H. Lee, (D.) 1160
——Sodium chloride. By J. B. C. Kershaw, (D. R.) 1160
Electrolytic detector, Influence of temperature on constants of. By H. Abraham, (D.) 866
Electromagnetic induction, Discovery of, 134
Electromagnetic force. By A. S. McAllister, *767, 860, 984; Carl Hering, *859; G. W. Patterson, 984
Electromagnetic wave energy, Distribution of, from simple oscillator, 1267
Electromobile, Legal decision on use of word, 90
Electronic theory. By G. A. Schott, (D. R.) 189, (D.) 1059; E. A. Partridge, (D.) 1293
Electrons, Positive, in the sodium atom. By R. W. Wood, (D.) 440
Electrotechnical progress during 1907, 84
Elevators, Electric:
——Dayton, Ohio, Service data, 480
——Economy of, 131
——New England central station conditions, 237
——Progress in elevator practice, 962
——Service data. By R. S. Hale and R. H. Gray, 191
Ellis Island, New York harbor, Improvements on, *692
Emerson Electric Mfg. Co., *526
Employees, Central-station:
——Educational courses for, 800
——Welfare work, Technical. By S. W. Ashe, 1050
Engineering English. By F. V. Henshaw, 305
Engineering Specialty Co., *519
Engines:
——American Ball "angle compound," *515
——Requirements of the modern engine. By A. M. Morse, 44
——(See also Gas engines)

*Indicates illustrated articles.

Entropy. By E. Kohl, (D. R.) 614
Eraser, Motor-driven, *1301
Europe, Notes from. By Louis Bell, 1363
Evolution and devolution of the elements. By A. C. and A. E. Jessup, (D.) 189
Export trade, Electrical, 753
Eyes:
——Effect of light on, 378
——Illumination and the eye. By Dr. Henry Gradle, 1320
——Precautions necessary in use of artificial illuminants, (D.) 985

## F

Fan, Electric, in heating furnace, *238
Fan motors:
——Alternating-current "Standard," *527
——Bates direct-current, *529
——Colonial, *528
——Diehl oscillating, *576
——Eck "Hurricane" oscillating, *529
——Emerson, *526
——General Electric, *525
——Lundell, *525
——Peerless direct-current, *529
——Tests of different types of fans. By A. C. Scott, 458, *473
——Western Electric, *528
——Westinghouse 1908, *530, *875
Fault locating. By T. Vaillant, (D. R.) 399
Federal Electric Co., *826
Feed-water heating:
——New method for. By S. A. Reeve, (D.) 728
——Tests of live-steam method. By J. Goodman and D. R. Maclachlan, (D.) 985
Ferguson, L. A., Portrait of, *1276
Ferracute Machine Co., *312
Figg & Watson, New York, *114
Fire alarm, Electric. By Auhagen, (D.) 988
Fire alarms in New York City, 966
Fire boats, Electrically propelled, for Chicago, *1040
Fire protection in New York City. Electrically operated, high-pressure water system, *555
Fires, Electric, London, (D.) 988
Fittings for superheated steam, 248
Fixtures. (See Lamp fixtures)
Flames as rectifiers. By A. Cathiard, (D.) 354
Flat irons, Electric. By W. J. Barr, 54
——Economy, *65
——Grinnell, Iowa, 426
——Westinghouse, *402
——(See also Laundries)
Floor-surfacing machine, Single-phase, *518
Flour, Bleaching, by electricity, 1087
Foreign demand for electrical apparatus, 333
Forest protection and the conservation of hydraulic resources, 542, 674
Forrest theater, Phil., Electrical equipment, *1369
Foster & Glidden Co., *827
Foundations, Engine and generator. By James Francis, *920
Foundry, Electrical equipment of, 486, 492
Franco-British Exhibition, London, *1272, (D.) 1292
Freeman, E. H., Electric Co., *193
Frequency-changing and load-equalizing plant. By J. S. Peck, (D.) 820
Frink, I. P., *68, *662
Fruit conveyor at New Orleans wharf, *340
Fuel:
——Coal and boiler room operation. By E. G. Bailey, 895
——Pulverized coal. Characteristics and preparation of. By W. D. Ennis, (D.) 107
——Selection of coal. By J. B. C. Kershaw, (D) 1343
——Tests of fuels for producer-gas plants, St. Louis, 895
Furnace arches for water-tube boilers. By S. A. J. Blackett, 251
Furnaces, Electric:
——High-pressure furnace as resistance or arc furnace. By R. S. Hutton and J. E. Petavel, (D.) 570
——Hoskins, for high temperatures, *874
——Induction furnace in the iron and steel industry. By V. Engelhardt (D. R.) 779
——Iron and brass foundry, Electric furnaces for. By J. B. C. Kershaw, *856.
——Kryptol as a resistor, (D. R.) 109
——Modification of induction furnace in German steel works. By Wedding, (D.) 151
——Steel, Refining of. By Thallner, (D.) 151
——Steel, Refining of. Energy consumption curves, (D.) 189
——Zinc oxide reduction. By J. W. Richards, (D. R.) 987
Fuse block, Non-replacable, *736
Fused salts. By H. M. Goodwin and R. D. Mailey, (D.) 309
Fuses:
——Enclosed, New high-tension, A. E. G. By W. Fellenberg, (D.) 398, 657
——Enclosed fuse called "Koolark," *443
——High-voltage. By E. B. Merrian, (D.) 657
——Lightning arrester circuits, *479
——Metal for, Selection of. By A. Schwartz and W. H. N. James, (D.) 778, 987
——Standardization proposed in England, (D.) 987
——Theory and practice, (D. R.) 58

## G

G. & W. Electrical Specialty Co., *735, *827, *1065
Gage, Multiple-draft. By J. H. Franklin, *92
Galvanometer scales, Direct-reading. By J. Rymer-Jones, (D.) *263
Galvanometers:
——Portable cable-testing, *615
——Universal, Queen & Co., *358
Galveston, Tex., Brush lighting system, 111
Garage and generating station of Auto Transit Co., of Phil., *383
Gas, 80-cent, in New York, Lawsuit, 756
Gas, Liquid illuminating, 897
Gas and electric consolidation in Massachusetts, 220
Gas and gasoline competition, 1012; by J. R. Cravath, *1233
Gas engines:
——Blast-furnace engine at Bessemer, *938
——Combined steam and gas engine, 89; by L. L. Dowthat, *351
——Efficiency tests, English, 335
——Fuel consumption. Tests by E. M. Blake, of Boston, 681
——Gases from copper blast furnaces for producing electric energy in German mines, (D.) 149
——Ignition system of Western Electric Co., *1344
——Measuring temperatures, Electric thermometer for. By H. L. Callendar and W. E. Dalby, (D.) 399
——Mesta, *1064
——Report to British Institution of Mechanical Engineers. By F. W. Burstall, (D. R.) 397, 439
——Report at N. E. L. A., 1102, 1152
——San Francisco station, 356
Gas ignition, Induction coils for, 1316
Gas leakage, Detection and prevention, 255
Gas producer, Jahns system. By O. Nagel, (D. R.) 188
Gas-producer plant, Suction, 15-hp, Test, (D. R.) 777
Gas supply, Readiness to serve cost of, 547
Gas works, Electricity in, Germany, (D. R.) 612
Gases, Electric discharges through. By J. J. Thomson, (D.) 779, 820, 865, 987, 1059, 1109
Gases, Magnetic properties of. By B. Tänzler, (D.) 821
Gases treated by electric arcs, Peterson apparatus, *897
Gasoline-electric automobiles, (D.) 354; by P. Gasmier, (D. R.) 354
Gasoline-electric car for railway service, General Electric Co., *191
Gasoline-electric omnibus, Hart-Durtnall, London, (D.) 262
Gasoline-electric railroading, 755
Gasoline torch, Using. By John Jackson, *500
Gear, Removable rolled rim, *1346
Gear ratios, (D. R.) 440
Gearing, Influence of ratio of, on consumption of energy. By O. Allen, (D. R.) 354
General Electric Co., *310, 312, *441, *521, *525, *575, *661, *828, *871, *939, *990, *1063, *1169, *1170, *1244
——Annual meeting of engineers, 1343
——Annual report, 963
——Labor cost distribution. By G. F. Stratton, (D. R.) 659
——Schenectady plant, 551
Generators:
——Allis-Chalmers turbo-generator in Memphis station, 575
——Behrend high-speed, direct-current, *1145
——Commutating-pole, station of Boston Elevated Ry., *310
——Direct-current, for lighting, industrial and railway service. By E. Korrodi, (D.) 1157
——Direct-current, Theory of. By P. Riebesell, (D.) 566
——Direct-current turbo-generators. By W. Hoult, (D.) 655
——Field reversal, A peculiar. By C. W. Kinney, (D) *512
——High-speed turbo-generators, Chief features of modern types. By G. Stoney and A. H. Law, (D.) 863, 1056
——Induction-motor-generators for London County Council tramways, (D.) 655
——Insulating couplings, Avoiding use of, (D.) 1109
——Interpole railway, Design of 2700-kw. By D. L. Galusha, (D. R.) 611
——Lord ventilated turbo-generator, *551
——Non-synchronous, Advantages of. By W. L. Waters, 371, 386
——Non-synchronous, in central-station work, 843
——Overload of generating sets, (D.) 1382
——Polyphase generator winding. By F. Punga, (D.) *438
——Shutting down, reduce voltage to lowest point, 925
——Standardization rules in different countries. By A. E. Kennelly, 1285; P. M. Lincoln, (D.) 1338
——Synchronizing induction-motor-generators. By L. Fleischmann, (D.) 611
——Synchronous, in Switzerland. By M. Yazidjian, 775
——Tests of electric machines; General considerations on. By F. Loppe, (D. R.) 655
——Three-wire, used as two-wire machine, 925
——Turbo-generators, Direct-current. By R. Pohl, (D. R.) 439
——Variable-voltage, Pauly patent, 134
——Voltage curves. By E. Siedek, (D.) 1108
——(See also Alternators; Dynamos; Motors)
Georgia, Central, Power Co.'s plant, 845
Georgia Institute of Technology, N. Y. Alumni Association, 640
Georgia Railway Electric Co., Standardizing laboratory of. By E. P. Peck, *769
German-American Electric Co., *1061
German Reichsanstalt, Work of, in 1906, (D.) 1109
Germany:
——Electric monopoly in. By Buddle, (D.) 189; E. H. Geist, (D.) 730
——Inspection of central stations, Proposed police regulations, 1185; by K. Wilkens, (D.) 1242
Glass manufacturers' problems, (D. R.) 571
Glue pots, Electric, *443, *661
Gold and silver, Refining of. By J. W. Richards, (D.) 570
Gould & Eberhardt, *523
Goulds Mfg. Co., *1169
Government regulation of power plants, 800
Governors:
——Fly-wheel, *41
——Water-wheel, Holyoke, *193
Grain elevators, Electric, Buffalo, 145
Grand Rapids, Mich.:
——Advertising men's meeting, 550
——Electrical show, 760; by L. W. Bailey, 1130
——Progress in electric heating. By H. W. Hillman, *722

House without a chimney, Carrollton, Ill., *258, 510
Hungarian Electrical Society, 550
Hunt, W. Tomson, Warning against, 173
Hydrodynamics and electromagnetism, Analogy between. By A. P. Wills, (D.) 779
Hygroscope, Electric. By J. Pionchon, (D.) 1160
Hysteresis, Magnetic, in rotating fields. By T. Weiss and V. Planer, (D.) 658

## I

Ice storms in Georgia. By F. P. Catchings, 931
Ideal Electric & Mfg. Co., *784, *1064
Igniting apparatus, Testing methods. By F. W. Springer, *343, *387
Illinois frontage-consent law, 1320
Illumination. (See Lighting)
Illuminating engineer, Province of the. By L. Gastner, (D.) 107
Illuminating Engineering Society:
——Annual meeting, 132
——April meeting, 845
——Boston meeting, 1189
——Chicago Section, 173
——March meeting, 595
——New York Section, 129

*Indicates illustrated articles.

Impostors, Warning against, 1013, 1022
Incandescent lamp guards, *1111, *1303
Incandescent lamps:
——Boron lamps, (D.) 932
——British and Continental standard carbon-filament lamps compared, (D.) 55
——"British Metalite," (D.) 1057
——Carbon filament, Improved form of, (D) 612
——Carbon-filament and mercury-vapor lamp combined, (D.) 933
——Cazin metallic filament patents, 220, 421
——Comparative tests, University of Illinois, 338
——Dimmers for domestic lighting. By Charles Wirt, *59
——Discussion at Minnesota convention, 545
——Distribution of light, Determining. By W. Voege, 373, (D.) 396
——Double-metal filament lamp, British patent, (D.) 777
——Ductibility of brittle metals, Increasing (D.) 933
——Efficiency, Ideal and actual, Difference between. By C. V. Drysdale, (D.) 1056
——Filament support, English patent, (D.) 656
——Gelnhausen method of exhausting lamp, (D.) 511
——Graphite filament, Manufacture, (D.) 1240
——Helion filaments, Clark patents, 133, *1364
——High-efficiency lamps in Germany, Summary of, (D.) 307
——High-efficiency, Table showing saving by use of. By James Ashburner, 252
——Improvement in construction, (D. R.) 1381
——Kuzel metallic filament, *1154
——Leading-in wire patent, Edison, invalid, 1084
——Leading-in wires, (D.) 1240, 1339; By B. Duschnitz, (D.) 1241
——Mechanical equivalent of light. By C. V. Drysdale, (D.) 1056
——Metallic filament:
British types, (D.) 1158, 1239
Characteristic curves. By H. Pecheux, (D.) *1290
Discussions at Iowa and Missouri conventions, 1016
Leading-in or supporting wires, (D.) 819
Leading-in wire, Aluminothermic method, (D.) 187
Qualities and commercial importance. By H. Remane, (D.) 611
Review of various lamps. By Voss, (D.) 107
Transformers for. By F. V. O'Hanlon, (D.) *511
Twisted filaments, Bloxam patent, (D.) 1339
——Metallic-filament lamps and central station business. By H. W. Handcock and A. H. Dykes, (D.) 1056, *1240; 1057
——Metallic-filament lamps in overloaded systems. By O. F. Brastow, (D.) 819
——Metallic filament and carbon-filament lamps, Facts regarding. By George Loring, 23
——Nernst lamp, Use of tungsten, (D.) 1241
——"Orieco" metallic-filament lamp, London, (D.) 727
Osram:
England, for street lighting, (D.) 353
Germany, (D.) 511, 932; 550
Life and cost of, (D.) 1241
——Physical properties of lamps compared, 219
——Pitch blende filaments, (D.) 933
——Plain and frosted lamps. By E. P. Hyde and F. E. Cady, (D. R.) 55
——Polar intensity curve, Method for obtaining, and recording luminous intensity. By W. Voege, 373, (D.) 396
——Specific resistance of metallic filaments, Increasing, (D.) 933
——Tantalum lamps:
Alternating current in England, (D.) 776
Bolton process of making, 1362
Faulting of filament under direct alternating intermittent direct current. By M. D. Abbott, *1374
Life of, 849
Price, in England, (D.) 612
——Tungsten:
American-made lamps. Use of lamps, 2
British patents, (D.) 1290
Competition with gas, Adrian, Mich., 931
Discussion at N. E. Association, 638
German lamp tests, 54
Heany patent case, 462, 756, 898
Introduction of the lamp discussed at N. E. L. A., 1183
Just and Hanaman patent, 342
Kuzel's method of making. By A. Lottermoser, (D.) 863
Low-voltage lamps, 850
Manufacture, Notes on, (D.) 1157
Manufacture by paste and coating processes. By H. Hirst, (D.) 1380
Overshooting of lamps. By J. B. Taylor, 841, 859, 1009, *1046; J. J. Doyle, 1155
Production of filaments. By C. H. Sharp, 682
Ruhstrat method for making, (D.) 1240
Siemens & Halske, (D.) 932
Street lighting. By P. D. Wagoner, 1103, 1152
Topeka, Kan., trial of lamps, 642
Van Brunt patent for purifying tungsten trioxide, 90
——Tungsten diffusing cluster, G. E., *1063
——Tuigsten lamp situation, 634
——Tungsten-oxide, British patent, (D.) 612
——Turn-down lamp, *1064
——220-volt lamps, Difficulties of making. By C. Heim, (D.) 307
Incandescent Lamps: (Continued)
——Voltage variation, Effect of, on candle-power of lamps. By F. Hirschauer, 417; (D.) 439
India, Hydro-electric plant at Missouri, 8
Indiana Engineering Society, Report on new illuminants, 216
Indicator, Merz maximum demand. By H. S. Hatfield, (D.) 658
Indigo, Electrolytic reduction of. By Chaumat, D. R.) 779
Inductance of transmission lines with unsymmetrically disposed conductors. By Alfred Still, 1098
Induction between parallel wires. By E. Orlich, (D.) 866
Induction, Electromagnetic, Law of, (D.) 864
Induction, Electromagnetic, Looping vs. cutting theories of. By Carl Hering, 543, 558; Elihu Thomson, H. O. Heckindorn, F. M. Denton, 653; A. B. Reynders, J. H. Morecroft, *654; C. A. Perkins, 655; J. R. Benton, 776; H. L. Bronson, *861; J. P. Jollyman, *861; S. Sano, 1156; James Gibbons, 1290.
Induction, Magnetic, in an elongated spheroid. By D. N. Mallik, (D. R.) 189
Induction coils. By B. F. Bailey, (D.) 1342
Induction coils for gas ignition, 1316
Induction coils, Roentgen-ray tube operation. By B. Zirotka, (D.) *152
Induction experiments. By R. T. Wells, (D.) 1343
Industrial development in the South, 330
Industrial plants, Electricity in:
——Bethlehem Steel Co., *469
——British iron works, (D. R.) 397
——Cargoo Fleet Iron Co., Middlesborough, England, *1296
——Cement works, British, (D. R.) 56
——Copper concentrator near Salt Lake City, 402
——Copper works, Raritan. By F. D. Easterbrooks, (D.) 985
——Electric drive, Engineering features of. By N. G. Meade, 1232
——Electric energy for industrial purposes. By J. F. C. Snell, (D.) 353
——English factories, Equipment of, 992
——Handware Factory, Syracuse, N. Y., 154
——Ilgner system for rolling mills. By H. Crowe, (D.) 1158
——Iron and steel mills. By W. E. Reed, (D.) 56
——Load equalizing system, *783
——Pacific Mills, Lawrence, Mass., 268
——Plaster plant, Syracuse, N. Y., 1065
——Railway shops in Argentine, (D.) 149
——Rolling mills in Europe, (D. R.) 107
——Rolling mill of Illinois Steel Co. By W. A. Dick, (D.) 511
——Rolling mill, 15-in. Merchant, at a British steel works, (D.) 656
——Rolling mill at Sandviken, Sweden. By O. Allen, (D.) 1057
——Rolling mills and various prime movers. By G. Hooghwinkel, (D.) 568
——Silk industry, Electric driving in. By A. Kidd, (D.) 819
——Small factories, Generating equipment of. By P. R. Moses, (D.) 612
——Textile mills, Advantages of electric driving for. By W. B. Woodhouse, (D.) 56; E. L. Hill, (D.) 511; J. Shaw, (D. R.) 511; N. G. Meade, 928
——Theory system for rolling mills, (D.) 511
——Wood-working machinery, Electric drive for. By J. P. Judge, (D.) 728
——Wood-working plant at Marion, Va., *1243
——Inspection by underwriters' inspectors, 1315; W. T. Jackson, 1337
——Inspection of central stations, Proposed German police regulations, 1185; By K. Wilkens (D.) 1242
——Inspection of electrical wiring, Discussion at Nebraska convention, 1127, 1132
——Installation rules, British and German compared. By W. P. Steinthal, (D.) 864
——Insulating couplings, *1113, 1338
——Insulating materials: Asbestos wood, 870
——Enamel, British make, (D.) 263
——Tape, Manufacture of, 267
——Varnished cloth insulation, 279; By C. B. Tibbetts, 818
Insulators:
——Gas-fired insulators, 1302
——Genoa transmission line. By G. Aufossi, (D. R.) 779
——High-tension, (D.) 657; By F. M. Locke, *781
——High-tension, for overhead lines. By C. J. Greene, (D.) *1058, 1292
——Manufacture, in English pottery, (D. R.) 779
——Movement of, in magnetic fields. By S. J. Barnett, (D. R.) 658
——Porcelain, Corrugated and plain. By C. C. Garrard, (D.) *1341
——Steinberger, for heavy conductors, *1053
——Testing. By W. Weicker, (D. R.) 1110
——Tests of resistance. By F. Negre, (D.) 1241
International Acheson Graphite Co., Improvements. 894
International Bureau of Weights and Measures. By C. E. Guillaume, (D. R.) 780
International Congress of Inventors, 968
International Congress for Prevention of Accidents, 1134
International Congress on Safety to Life and Labor, 756
International Electric Meter Co., *152
International Independent Telephone Association, Convention, 171, 212
International Instrument Co., *616
International Telegraph Conference in Lisbon, 1268
Interrupter, Wehnelt, Dampening noise of. By E. Renz, (D. R.) 730
Inventors. (See Patent Office)
Ionization:
——Discharge of electrodes. By J. G. Davidson, (D. R.) 309
——Measuring. By S. J. Allen, (D.) 108
Ions, Electric charge of. By H. Pellat, (D.) 355
Iowa Electrical Association, 892
Iron and brass foundry, Electric furnaces for. By J. B. C. Kershaw, *856
Iron and steel, Electrothermic production. By J. W. Richards, (D. R.) 151, (D.) 309; S. A. Tucker, (D. R.) 309, 614
Iron losses, Measurement of. By J. Sahulka, (D. R.) 109
Iron stampings, Heat conductivity of. By T. M. Barlow, (D.) 395
Irrigation with electrically-driven pumps. By W. P. Johnson, 1207

## J

Jandus Electric Co., *63
Japan:
——Electrical Science Association, 894
——Manufacture and importation of electrical machinery. By M. Kawara, 846
——Transmission plant on Hitaka River, *135
Jenney Electric Mfg. Co., *1169
Jersey City and electric light and power franchises, 1269
Johns-Manville, H. W., Co., 870
Joints, Wiping lead, *1248
Joints for wires and cables devised by E. Begot. By F. Loppe, (D.) *1342

## K

Kelman, J. N., Los Angeles, Cal., *732
Kelvin, Lord:
——Burial in Westminster Abbey, 8, 90
——Memorial exercises in New York, 88, 126, 128
——Submarine telegraphy, Work with, 466
——Verses to, 8
Kennelly diagram. By A. E. Kennelly, 634, *645
Kirchhoff, Charles, Dinner to, 170
Korst, P. H., Portrait of, *169
Kryptol as a resister in electric furnaces, (D. R.) 109

## L

Labor. (See Employees)
Laboratories:
——Birmingham Railway, Light & Power Co., *1330
——British National Physical, (D.) 865
——Clemson College, South Carolina, *1332
——Electric railway, at Worcester Polytechnic Institute, *1191
——Motors for testing machines, *825
——Standardizing, of the Georgia Railway Electric Co. By E. P. Peck, *769
Lambert Hoisting Engine Co., *1386
Lamp fixtures:
——Clusters for tungsten lamps, *826
——Cords and chains for. By C. T. Alton, 260
——Locking base, *1345
——Rational fixture design, 211
——Tungsten lamp, *871, *1301
——Washington Union Station, *1047
——Wireless cluster, Benjamin, *67
Lamp posts:
——Chicago, *30, 596
——Concrete, *63
——Dubuque, Ia., *51
Lamp sockets:
——Device of Magunna, (D.) *151
——Locking, *828
Lamp support, Adjustable, *735
Lancaster, Pa., Central-station display room, *509
Laredo, Texas, Electric power developments. By W. D. Hornaday, *1201
Lathes:
——Brass-finishing, *1385
——Portable motor-driven, *266
Laundries, Electric equipment:
——Atlanta, Ga., *507
——Costs, Relative, of steam and electricity, 507
——Motor equipment in, 491
——Philadelphia Hospital, *507
Law of electric light companies. By J. E. Brady, 35, 235, 708, 1214
Lead:
——Electrometallurgy of. By J. W. Richards, (D.) 355
——Radioactivity of. By J. C. McLennan, (D.) 108
Leeds & Northrup, *615
Legal:
——Cost of electric lighting in England, (D.) 933
——Frontage-consent law in Illinois, 1320
——Injunction against newspaper for inciting conspiracy against telephone company, 332
——Transformer litigation, 10
Light:
——Daylight, Quantity and quality of, compared with artificial light, Tests by Nichols, 1186
——Effect of, on the eye. By Schanz & Stockhausen, (D.) 149; H. H. Seabrook, 378
——Graphic method for determining mean spherical intensity of a lamp. By A. E. Kennelly, 634, *645

*Indicates illustrated articles.

Light: (Continued)
——Mechanical equivalent of light. By C. V. Drysdale, (D.) 307, 1056
——Polar curves, Obtaining. By W. Voege, (D.) 1241
——Standard, Proposed synthetic primary, 1010
——Standards of. Proposed international candle, 633, 638
——Standards, Working. By C. O. Bond, (D.) 1294
——What is light? By P. G. Nutting, 1361, *1371
Light-flux, Use of term, 1080
Lighting:
——Arc lamps for interior lighting, (D.) 727
——Architecture, Relation of illuminating engineering to, 595, 635
——Berlin, High-efficiency lamps in. By L. J. Auerbacher, 422
——Boston matters, 1128, 1362
——Chicago streets, *29
——Church lighting, Small Chicago church, *902
——Color and light in decoration. By G. L. Hunter, 372, 392
——Costs of various kinds of lighting. By A. Klondel, (D.) 107
——Dangers of artificial lighting, 127, 129
——Diffusing light from high candle-power lamps, 677
——Direct and indirect illumination, (D. R.) 261
——Distribution of light from a lamp, Determining. By W. Voege, 373, (D.) 396
——Economical aspects of the various electric illuminants. By A. A. Wohlauer, 1007, 1042, 1290
——Emergency lights for residences. By G. H. Jones, *502
——Gas-lighted rooms, Decorations in, 843
——Height of suspension, Influence of, upon uniform illumination. By A. A. Wohlauer, 590, *601
——High-efficiency lamps in Kaiserslautern, Germany. By L. J. Auerbacher, 216
——Hotel Albany and College Inn. By H. T. Owens, *1199
——Installation of fixtures, Care necessary, 890
——Interior illumination: Measurements made in libraries and public buildings, by E. F. Legg and H. I. Townsend, 210, 230
——Law of electric light companies. By J. E. Brady, 35, 235, 708, 1214
——London, Arc lighting in, (D.) 149
——Manchester Cathedral, (D. R.) 188
——New York. Investigation. Right of State to fix rates, 172, 215, 461
——New York Custom House. By H. T. Owens, *293
——Number of lamps for uniform illumination. By A. A. Wohlauer, *1376
——Peculiar electrical phenomenon. By F. W. Merrill, *498; A. B. Case, F. O. Brom, 717
——Plaza Hotel, New York. By H. T. Owens, *17
——Polar intensity curve of lamp, New method for obtaining. By W. Voege, 373, (D.) 396
——Residences. Economical and efficient plans for lighting small houses. By J. R. Cravath and V. R. Lansingh, *690
——Restaurant, Murray's, New York. By H. T. Owens, *226
——Store lighting. By G. H. Stickney, (D.) 933
——Store lighting. Meeting gas competition. By J. R. Cravath, *1233
——Street lighting:
First use of electricity, 720
Height of lamps, 720
London tests. By H. Harrison, (D.) 55; A. A. Voysey, (D.) 1381
Metallic-filament lamps in Great Britain, (D.) 1291, 1381
New illuminants and street lighting. By Dr. Louis Bell, 100
Osram lamps at East Bourne, England, (D.) 353
Osram lamps, Life and cost, (D.) 1241
San Francisco, *508
Specifications, Report of N. E. L. A. committee, 1126
Tungsten lamps, Leicester, Mass., 146
——Tantalum lamps, Muncie, Ind., *146
——Train lighting, Electric. By T. Wallitschek, (D. R.) 149
Austrian-Hungarian R. R., 1273
Dynamo of Iglesis and Regner. By S. Iglesis, (D.) 776
Felten & Guilleaume-Lahmeyer Co., (D. R.) 656
——Uniform illumination of horizontal planes. By E. W. Weinbeer, 1107; A. A. Wohlauer, 1156
Lighting expansion in the U. S., 797
Lightning arresters:
——Aluminum cell, G. E., *990
——Electrolytic, *783
——High-tension circuits. By J. S. Peck, (D.) *568
——Series resistance and reactive coil play, 1230
——Tests, 1086
Lightning disturbances in electric circuits and their remedies. By J. F. Vaughan, (D. R.) 1159
Lightning flash. By Bermbach, (D.) 355
Lightning on a 72,000-volt transmission line, 1192
Lightning protection. By R. B. Jackson, (D.) 513, 820, 935; C. P. Steinmetz, (D.) 1383
——Discussion at N. E. L. A., 1193
——Present status of the lightning problem. By P. H. Thomas, 1283
Lincoln Electric Co., *68, *1246
Lines of force, Faraday's Physical meaning of. By F. Sanford, (D.) 865
Lockers, Metal, *266, *1301
Locomotives, Electric:
——Detroit River tunnel, *824
——Large locomotives for heavy service. By B. Valatur, (D.) 262
——Signals, Electric cab. By J. Pigg, (D.) 149
——Single-phase, on Prussian State Railways. By W. Wechmann, (D.) 1158
——Testing plant for industrial locomotives, *662
London, Proposed consolidation of electric supply systems, (D.) 189, 301
Long Acre Light & Power Co., 548, 594, 758, 844, 1014, 1084, 1188
Loops vs. cutting lines of force. (See Induction, Electromagnetic)
Lord Electric Co., *1238, *1301, *1386
Losses in alternating-current systems, (D.) *1382
Lubrication, Continuous system in West Virginia mine, *736
Lunkenheimer Co., *1346

## M

Machine acceleration and retardation, Automatic, Ward Leonard patent, 1189
Machine tools, Motor-driven, 492, 493
——Memphis, Tenn., 185
——Tests at Barre, Vt., 31
Machinery Club of New York City, 1085, 1129
Mackay School of Mines, 1324
Magnets:
——Alternating-current, Kramer, *331
——Lifting magnets, *872
——Weighing, in varying magnetic fields. By L. A. Bauer, (D.) 58
Magnetic alloys. By P. Asteroth, (D.) 1242
Magnetic properties and thermal treatment. By J. G. Gray and A. D. Ross, (D.) 1160
Magnetic detector. By A. G. Rossi, (D.) 866
Magnetic induction in an elongated spheroid. By D. N. Mallik, (D. R.) 189
Magnetic leakage in induction motors. By R. E. Hellmund, 166, 179
Magnetic observations and deductions by the Carnegie Institution, 798
Magnetic properties of an alloy steel, (D.) 514
"Magnetic rays." By A. Righi, (D.) 821
Magnetic reactance, Slide rule in the calculation of, 126; by M. S. Howard, 142
Magnetic rotary dispersion of neodymium. By R. W. Wood, (D. R.) 441
Magnetic testing of iron. By W. H. F. Murdoch, (D.) *58
Magnetism, Theory of. By Pierre Weiss, (D.) 1384
Magnetism and specific heat. By P. Weiss, (D.) 398
Magnetite arc. By G. M. Dyott, 842, *854, 968
Magnetization. By O. W. Richardson, (D.) 821
Magneto-optical observations. By W. Voith, (D. R.) 729
Manganese steel for coil shields, *1168
Manholes, Inspection of. By J. A. Seager, *251
Manila, P. I., Carnival at, *963
Manufacturing plants, Arrangement of. By G. M. Brill, (D. R.) 1161
Marble, Filling holes in, 255
Marconi Canadian commercial service, 374
Marion, Ind., central-station enterprise, 510
Marseilles International Electrical Exhibition, 172, 468, 636, *681, 962
Marshall Electric Co., *1302
Martin, T. C., Dinner to, 170
Mass, Relation of, to energy. By D. F. Comstock, (D.) 189
Massachusetts Institue of Technology, Graduate study at, 330
Massage vibrator, Vacuum electric, and shampoo comb, *734
Matter, Formation of, from atomic origin. By Lord Kelvin, (D.) 936
Measurement of resistance with a voltmeter, 255
Measurement of short lengths. By M. A. Guillet, (D.) 1110
Measurement of weak alternating currents. By H. Abraham (D.) 658; (D. R.) 1161
Measuring bridge, Portable. By D. Bercovitz, (D.) *355
Measuring instrument for incandescent lamps, (D.) 727
Measuring instruments of the American Instrument Co., *574
Measuring instruments, High-frequency. By J. Bethenod, (D.) 1294
Measuring instruments, Treatment of. By T. Edgcumbe, (D.) 355
Meat market, Electric refrigeration in. By R. L. Lloyd, *489
Meat-packing industry, Electricity in, *873
Mechanical stokers. By J. E. Barnes, (D.) 1343
Memphis, Tenn., Growth of electric service, 184
Mercury arc rectifier battery charging outfits, *1171
Mercury arc rectifier in moving-picture shows, *939
Mercury-vapor lamps:
——Carbon filament in U-tube, (D.) 727
——Cooper Hewitt, Automatic tilting, *153; by F. H. von Keller, *782
——Lead-bismuth-mercury, alloy. By L. Arons, (D.) 353
——Phenomena of. Kuch patent. 896
——Silk mill installations, 937
——Starting lamp. By P. A. Huguenin, (D.) 1241
——Steinmetz lamp, *1054
Mercury-vapor rectifier. By K. Hahn, (D. R.) 567
Mesta Machine Co., *1064
Meter laboratory of Birmingham Railway, Light & Power Co., *1330
Meters:
——Accuracy, Commercial importance of, 676
——Accuracy of electric meters, 1289
——Alternating-current instruments with iron. By W. E. Sumpner, (D.) *822
——British standard specifications for consumers' supply meters, 674
——D'Arsonval, Single air-gap construction in. By Paul MacGahan, *357
——False meter connections. By C. Herz, (D.) *513
——German induction meters, (D) *309
——German meter practice. By A. Konigswerther, (D.) 570
——Inspection in New York City, 330
——Inspection and repairing of service meters. By J. B. Baker, 1334
——Location on switchboards, effects of external fields, 1277
——Meter and relay connections. By H. W. Brown, (D.) 1242
——Polyphase, defined, 925
——Prepayment meters in England. By J. B. Clarke, (D.) 728
——Repulsion, for alternating currents and potentials. By J. M. Lea, *152

## P

Paint, Preventing peeling of, 48
Painter, G. E., Boston, *736
Paraffine engine, Allen, (D. R.) 1158
Parks and electric railways, (D. R.) 308
Patent agreement between U. S. and Germany, 968
Patent Court of Appeals, United States, proposed, 847
Patent law, British, 133, 327, 346, 642, 678
Patent Office:
——Defects of the Patent Office system, 541; By J. H. Boyden, 818
——Rights of the inventor. By H. W. Leonard, 561, 1055; Ludwig Gutmann, J. Nilsonow, 744; C. H. Chalmers, 863; T. J. Johnston, 984
——Salaries of examiners. By J. B. Baker, 547
Patent Office Gazette. By J. S. Seymour, W. H. Kenyon, T. J. Johnston, W. B. Vansize, Rosenbaum and Stockbridge, F. L. Dyer, Harold Serrell, E. P. Thompson, 81, 103; Richard Eyre, 147, 166
Patent Office models. By J. J. O'Brien, 1237
Patent Office scandal, 462, 756
Peat, Power from. By T. Tomlinson, (D. R.) 56; A. P. Lennox, (D. R.) 188
——Use of peat in Ireland, (D.) 985
Peerless Electric Co., *529
Peoria, Ill., electrolysis suit, 592
Peregrinus and Paracelsus. By Brother Potamian, 186
Permeability of magnetic material, Equation representing, 1230
Permeameter, Plug. By C. V. Drysdale, (D) 1110

Peru:
——Electrical development, 376
——High-tension energy transmission, *223
Petrol-electric omnibus. By P. T. Smith and W. A. Stevens, (D.) 864
Philadelphia Auto Transit Co.'s generating station and garage, *383
Philadelphia Electric Co., General office building, *91
Phonograph motor, *521
Phosphorescence. By A. Stephenson, (D.) 658
Photo-electric effect, (D.) 1384
Photography:
——Belin system, 960; By N. S. Arnstutz, 1107
——Sivelli apparatus, (D.) 265
Photography, Wireless:
——Berjonneau system, 10
——Knudsen's work, (D.) 1111
——Rieder experiments, (D.) 867
Photometers:
——Edgcumber portable incandescent lamp photometer. By C. Raulus, (D.) 570
——New universal. By C. H. Sharp and P. S. Millar, *181
——Selenium, *1274
Photometric precision. By A. E. Kennelly, 1104, 1152
Photometry:
——Gas photometry. Report of American Gas Institute, 209, (D.) 261
——German arc-lamp factory, 208, (D.) 261
——Kennelly diagram. By A. E. Kennelly, 634, *645
——Tests of International Commission. By F. Laporte, (D. R.) 309
Physiological effects of electricity. By Müllendorf, (D. R.) 570
Pine Ridge, N. J., Municipal plant deficit, 760
Piping:
——Engine-room. By James Francis, *43
——Steam-pipe systems for generating systems. By J. H. Rider, (D.) 261
Pittsburg Pole & Forge Co., *1113
Planer, Mammoth motor-driven, *112
Plants, Effect of electricity on, *710; By J. H. Priestley, (D.) 867
Plaster plant, Syracuse, N. Y., electrically operated, 1065
Plating iron and steel with zinc. By S. Cowper-Coles, (D.) 987
Plaza Hotel, New York, Lighting of. By H. T. Owens, *17
Poincaré, Henri, (D. R.) 781
Poles:
——Consumption statistics, 375
——Glass, 11
——Joint pole lines for lighting and telephone circuits, 1266

——Portable regulating, for laboratory use. By C. Fredenhagen, (D.) 441
Rheostats:
——Liquid starting, *875
——Load rheostat, *575
——Load rheostat for two voltages, *1060
——Motor-starting enclosed, *403
——Motor-starting, Ward Leonard, *826
——Water, (D.) 1059
——Westinghouse direct-current starting, *660
Rio de Janeiro, Electricity in, *976
Robbins & Myers, *527, *1113
Rockford Edison dinner, 545
Roentgen-ray apparatus, Progress in, (D.) 264
Roentgen-ray tubes. By J. Trowbridge, (D. R.) 355
Roentgen rays, Theory of. By C. G. Barkla, (D.) 440
Rolling mills. (See Industrial plants)
Rome, Italy, Electrical development, 1321
Roosevelt, President, on monopoly of water power, 463
Roots, P. H. & F. M., Co., *1112
Rope, Wire, Electric testing of cross-section, 503
Rope ends, Serving. By James Francis, *254
Roth Brothers & Co., *1062
Roth Brothers & Co., *1385

## S

St. Louis Electrical Show, 330
San Francisco:
——Electrical decorations, *1190
——Street lighting, *508
Sandycroft Foundry Co., *872, *875, *989
Saratoga Gas, Electric Light & Power Co. and lighting rates in New York State, 215, 461
Searchlight, Carlisle & Finch, *993
Selenium:
——Conductivity of, and illumination. By G. Athanasiadis, (D.) 569
——Experimental investigation. By C. Ries, (D.) 729
Selenium cells, Change of resistance. By F. C. Brown and J. Stebbins, (D.) 987
Self-inductance:
——Calculation of, of coil of any length. By E. B. Rosa, (D.) 441
——Determination of coefficient, (D.) *190
——Formula for. By L. Cohen, (D.) 399
——Measurement of coefficient, under normal load. By C. C. Chapin, *299
Self-induction apparatus for measurements by differential method. By H. Hausrath, (D. R.) 190
Sellers, Wm., & Co., *1244
Sewage pumping stations at Dayton, Ohio, *942
Sewing machine motor, *661
Shaper, Motor-driven, *523
Signals:
——Block signals, Remedying effects of foreign current, (D. R.) 514
——Chicago South Side Elevated block signal system, (D.) 657
——Electric cab signal on British locomotives. By J. Pigg, (D.) 149, 848
——Railway signals. By F. B. Corey, (D. R.) 308
——Single-phase railway, *522
——Switch indicator. By F. B. Corey, (D. R.) 308
——Tunnels under Hudson River, 463
Signals, Submarine, Sound for controlling operations at a distance. By J. Gardner, (D.) 190
Signals and telephony in a factory. By K. Koehler, (D.) 937
Signs, Electric:
——"Heatherbloom," New York, *726
——Janesville, Wis., *260
——Knickerbocker Hotel, New York, *1053
——Modern advertising, *52
——Painting galvanized electrical signs. By Peter Ransom, 923
——Scranton, Pa., *260
Simplex Electrical Co.'s banquet, 571
Sleeve ironer, Motor-driven, *504
Slide rule:
——British, for determining sectional area of cables, (D.) 262
——Calculation of magnetic reactance, 126; by M. S. Howard, 142
——Multiple, for steam-engine calculation, (D.) 1241
Smith, A. L., & Co., *65
Smoke, Causes of. By B. K. Tuttle, 47
Snow-fighting equipment. By J. Ralph, (D.) 612
Society of Wireless Telegraph Engineers, 1324
Socket threads, Proposed German standardization, (D.) 1242
Sodium atom, Positive electrons in. By R. W. Wood, (D.) 440
Sodium vapor, Resonance spectra of. By R. W. Wood, (D.) 1293
Soldering fluxes, Convenient, 736
Soldering materials. By M. Corsepius and A. Lippmann, (D. R.) 265
Soldering materials called Tinol and Fludor. By E. Hohler, (D. R.) 988
Solenoids in series with resistance, 126; by C. R. Underhill, 140
Sound, Measurement of. By G. D. Shepardson, 305
South Africa, Wiring in, (D.) 354
Southwestern Electrical & Gas Association, 894, 1086
Spark coil, Construction of. By F. C. Mason, *916
Spark discharges, Influence of temperature on minimum potential of. By P. Pringheim, (D.) 440
Spark gap, High-frequency. By J. Koehler, (D.) *780
Spark, Short, phenomena. By W. Duddell, (D.) 1293
Spectrophotometer, 436; by R. A. Houstoun, (D.) 570
Speed indicator of Swiss make, for railways. By S. Herzog, (D. R.) 614
Sprague Electric Co., *65, *525, *1346
Standard diagrams for connections and machinery, 1187
Standard Electric Accumulator Co., *62
Standardization. By R. T. Glazebrook, (D.) 866
Standardization rules for stationary, direct-current machinery in France, Germany, Great Britain and the United States. By A. E. Kennelly, 1285; P. M. Lincoln, (D.) 1338
Standardizing laboratory of the Georgia Railway Electric Co. By E. P. Peck, *769
Stealing electric current, Method of, *479
Steam-pipe hangers. By J. F. Hobart, *1227
Steam power plants, Cost of. By F. Koester, (D.) 55
Steam turbines:
——Curtis turbine and comparisons with reciprocating engine. By W. L. R. Emmett, (D. R.) 307
——Design and development. By S. L. Pearce, (D.) 934
——Design of turbine plants, Principles governing, 349
——Double-flow, Westinghouse, *1161
——Fall River electric light plant, *175

*Indicates illustrated articles.

Steam Turbines: (Continued)
——Low-pressure, Advantages of. By J. W. Kirkland, 1102, 1152
——Possible improvements. By J. M. Bailey, (D.) 1339
——Review of 1907, 6
——Tests of Parsons and Curtis turbines. By W. L. R. Emmett, 102, 565; J. R. Bibbins, 432; H. D. Jackson, 566
——Zoelly, (D. R.) 568, 1021
Steamships, Electric equipment of. By W. D. Kirkpatrick, (D.) 728
——"Mauretania," (D. R.) 1058
——Turbo-electric propulsion, 554, (D.) 568
Steel:
——Corrosion of. By A. S. Cushman, (D. R.) 513
——Electric steel. By R. H. Wolff, (D.) 1384
——Magnetic properties of an alloy steel, (D.) 514
Stereotypers' matrix driers, Electric, *1170
Stock. Are issues of capital stock, which do not represent cash invested, justifiable? By W. H. Winslow, 708
Stock ticker system, Barclay patent, 174
Storage batteries:
——Aluminum, 221
——Charging hurriedly, 48
——Control apparatus, Automatic, *311
——Edgar Thomson Works, 403
——Edison, in automobile service, *869
——German installation practice, (D.) 1383
——Load equalizing system, *783
——Mercury arc rectifier used in charging, Memphis, Tenn., *185
——Rectifier station for charging. By R. Venus, (D.) 1292
——Review of 1907, 5
——Standard cell-boxed active material, *62
Storage ignition battery, Helios, *402
Store exhibits at Providence, R. I., *477
Stott, H. G., Portrait of, *1275
Straightening iron poles and armature shafts. By J. F. Hobart, *718
Stream lines and equipotentials, Determining. By L. F. Richardson, (D.) 440
Strike, Rocky Mt. telephone, 1290
Sturtevant, F. B., *520, *1247
Substations:
——Auburn, N. Y., Distribution of Niagara energy, 888, *899
——Barre, Vt., *34
——Berlin, Germany, (D.) 820
——North Seattle, Wash., *1329
——Portland (Ore.) Railway, Light & Power Co., *851
——Standardization of direct-current railway. By J. E. Woodbridge, (D.) 1241
Subways:
——Berlin, Proposed. By E. C. Lehme, (D. R.) 188
——London, Kingsway tramway, (D.) 777
——New York:
Arnold report on capacity, 1128
Private ownership and construction, 11
Signal and interlocking system, Arnold report, 593
Superheated steam, Use of, in electric plants. By Ulrich, (D.) 56
Superheated steam fittings, 248
Switchboard Equipment Co., *400
Switchboards:
——Electrically operated. By S. Q. Hayes, *239, *909, *1218
——Growth in design of, 891
——3200-volt, at Hull, (D.) 864
Switch boxes for use in mines, *1303
Switch-gear relays. By C. C. Garrard, (D.) *1340
Switches:
——Bellows type relays for high-tension switches, 1274
——Cell switches, Wiring calculations for. By F. Steindl, (D. R.) 864
——Design of knife switches. By W. O. Milton, (D.) 57
——Double-magnet, quick-break switch for remote control, *941
——Eight-day time switch, *616
——Hartford automatic time, *518
——High-potential disconnecting, *1248
——Location of switch and cut-off, 720
——Magnet, for direct- or alternating-current circuits, 359
——Remote-control, *940
——Starting induction motors, *1302
Switching, Current rushes at. By J. S. Peck, (D.) 777
Switching apparatus of large hydro-electric stations, Operation of. By F. E. Conrad, *1139
Synchroscope, Physical theory of. By A. R. Dennington, 754, *771

## T

Tailor's electric iron, *1063
Tantalum, Production of homogeneous bodies from, 89
Technical Publicity Association, 966
Telegraph and telephone investigation, 1186
Telegraph lines, Eliminating disturbances, Taylor system, *86
Telegraphy:
——Duplex telegraphy. By H. Marchand-Thiriar, (D. R.) 570
——Formulas for loss of current. By W. Bubenik, (D.) 823
——Postal telegraphy, France, 89
——Printing telegraph at U. S. Capitol, *466
——Submarine, Kelvin's work, 466
Telpherage. By M. Buhle, (D.) 985
Telephone and power wires on same pole line, (D.) 936
Telephone convention in Chicago, 171, 212
Telephone installations:
——Largest in the world, New York City, 804
——London, East Ham exchange, (D.) 823
Telephone journals, Early. By Fred DeLand, 563
Telephone patents, 101, 186, 304, 350, 394, 437, 564, 608, 652, 773, 859, 983, 1106, 1155, 1337, 1378
Telephone rates:
——Boston, Lower rates recommended, 679
——Message rates vs. unlimited-service rates, (D.) 614
——Rochester, Increase is illegal, 597
——Scientific, Report by George Albree, 134
Telephone switchboard, Fowler circuit, *608
Telephone transmitters:
——Clausen, *304
——Dean combined register and transmitter, *1378
——Haff, *101
——Hausen, *101
——Ries, *101
Telephones:
——Antiseptic device, Printz, 101
——Desk stand, Oliver, *1380
——Fusible protector, Sachs', *186
——Portable, for repair work. By G. Foerster, (D.) 823
Telephony:
——"Auto-side tone" circuit, *652
——Bradford, England, exchange, (D.) 265
——Composite system, Rugh, *983
——Dictation system, Kelly, 305
——Distortion in telephonic transmission. By Béla Gàti, 862
——Efficient arrangement of telephone lines. By F. H. Abraham and D. Charbonnel, (D.) 264
——Emergency installation at Antwerp, 991
——Experiment apparatus. By Heilbrun, (D.) 1110
——Germany, "Loaded" cables, 423, (D.) 441
——Leakage and insulation resistance of telephone lines. By B. S. Cohen, B. Gàti, C. V. Drysdale, (D.) 1110
——Long-distance experiments, (D.) 1343
——Measured-service system, 1379
——Memphis, Tenn., 185
——Party-line lock-out systems, *609
——Party-line systems, 186, 350, 437, 1379
——Phantom circuit, 1230
——Pocket telephone system, 609
——Progress of, 83
——Progress of, in Great Britain. By B. S. Cohen, (D.) 570
——Propagation of currents in underground lines. By H. Abraham and Devaux-Charbonnel, (D.) 190, 659
——Pupin system of telephone lines. By M. Klein, (D.) 441
——Review of 1907, 4
——Ringing key, Manson, *1379
——Selective ringing up. By R. Heilbrun, (D.) 265
——Sender for automatic exchange, Roberts, 350
——South Dakota, 174
——Strowger automatic system. By F. Lubberger, (D. R.) 191
——Switchboard circuit, Frick, *773
——Train signaling system, 1155
——Two-wire circuit systems, 394
Temperature rise of conductors. By C. C. Badeau, 82, 95
Testing, Artificial load for. By R. K. Morcom and D. K. Morris, (D.) *865; N. C. Olin, (D.) 987
Testing electric machinery. By W. M. Hollis, *710
Testing igniting apparatus, Methods of. By F. W. Springer, *343, *387
Testing instruments, direct-current portable, Use of. By E. P. Peck, 1220
Tests, Convenient, for central station operators. By W. M. Hollis, *244
Texas, Electric power development on the Rio Grande border. By W. D. Hornaday, *1201
Thawing ice in telephone conduits by electricity, 923
Theaters, Electric power in:
——England, (D.) 728
——Forest theater, Phil., *1369
Thermal treatment and magnetic properties. By J. G. Gray and A. D. Ross, (D.) 1160
Thermit for emergency repairs. By F. W. Moore, *1227
Thermit for steam-pipe repairs. By John Jackson, 920
Thermoelectric couple. By Pecheux, (D.) 866
Thermoelectric properties of various common metals. By A. G. Warren and M. Murphy, (D.) *513
Thermomagnetic effect. By L. L. Campbell, (D.) 1343
Thermometer, Electric, for measuring gas engine temperatures. By H. L. Callendar and W. E. Dalby, (D.) 399
Thermostats, Best material for, 503
Three-wire, direct-current system with alternating-current connections. By W. Fuhrmann, (D.) 1292
Thunder, Rolling of. By B. F. Groat, 103; D. S. Carpenter, *306, 338
Thury system for rolling mills, (D.) 511
Torpedoes, Branby wireless, 424
Towers, Erection of steel, in Porto Rico. By W. R. Strickland, *1288
Towers, Steel, on Swedish transmission line, (D.) 728
Track construction and maintenance. By H. L. Weber, (D. R.) 934
Train lighting. (See Lighting)
Train performance, Graphical methods in solving problems of. By W. S. Valentine, (D.) 440
Train resistance. By C. A. Carus-Wilson, (D.) 188
Transformation, Direct-current, Weintraub patent, *335
Transformation from three-phase to single-phase. By W. S. Moody, 306
Transformer litigation, 10
Transformer oil affected by cold weather, 925
Transformers:
——Calculating dimensions. By E. Elm, (D.) R.) 726
——Choice of transformers for central stations. By L. A. Starrett, 908, 1238; J. G. Homan, 1238
——Connecting difficulties, 503
——Cooling, on cars, Moody patent, 221
——Design. Relation between iron and copper in transformers. By M. Kawara, 753, *768
——Emergency transformer connection. By M. C. Godbe, (D.) *778
——Metallic-filament lamp transformers. By F. V. O'Hanlon, (D.) *511; A. Bainville, (D.) 1240; (D.) *1240
——Overheating of, 503
——Parallel operation, 925
——Ratio of transformation, Determination of, 925
——Ratio of transformer rating to motor rating, 925
——Resonance transformers. By J. Bethenot, (D. R.) 306
——Series transformer. By E. S. Harrar, *1044; M. G. Lloyd, 1157
——Size of, on poles, 1230
——Small transformers for metallic-filament lamps, (D.) *726
——Special applications of standard. By H. W. Young, (D.) 57
——Standard performance. By R. Goldschmidt, 419; (D.) 438
——Testing. By W. M. Hollis, *915
——Three-phase to two-phase transformation. By W. J. Wooldridge, (D.) 935
——Two transformers for three-phase transformation, 720
——Voltage drop and stray field. By G. Benischke, (D.) 566
——Wave form, Effect of. By L. T. Robinson and A. Holz, (D.) 819
Transmission of electric power:
——Circulation of alternating-current lines. By A. Blondel, (D.) 1109, 1291
——Economical limits of voltage in underground cables. By J. B. Sparks, 889, (D.) 935
——Erection of towers in Porto Rico. By W. R. Strickland, *1288
——France, Rhone River to Paris, (D. R.) 107
——German regulations, (D. R.) 189
——High voltages, Increase in use of, 675
——Inductance of transmission lines with unsymmetrically disposed conductors. By Alfred Stiel, 1098
——Induction effects of high-tension transmission lines on telephone wires. By O. Brauns, (D.) 1110
——Line construction for high-tension system, *1222
——Protection of high-tension circuits, (D.) 512; J. S. Peck, (D.) *568, 728
——Review of 1907, 2
——Suburban districts, Energy transmission in. By G. H. Lukes, 1103, 1153
——Surges and oscillations on transmission systems, 680
——Transmission line considered as a mechanical structure. By W. T. Ryan, 429
Transmission, High-speed, high ratio. By A. T. Kasley, *1225
Transmission plants:
——Austria, Kindberg station, (D.) 864; Feistritz works, (D.) 864
——Austria, in Steiermark, (D.) 657
——France, Southern. By J. J. Green, *979
——Germany, in the Urft Valley, (D.), 985
——Indiana coal fields, Proposed plant in, 681
——Ireland project, (D.) 585
——Italy, Caffaro to Brescia, (D.) 568, 727
——Japan, on Hitaka River, *135
——Mexico, the Sultepec Electric Light & Power Co. and the Toluca Electric Light & Power Co., *1279
——Montpelier, Vt., power developments, *30
——Nevada-California Power Co., 893
——Niagar energy in Auburn, N. Y., 888, *899
